

Neighbourhood Nature Play Project December Programming

Join our Nature Play Animators at *Kingsdale Park* and *Gzowski Park* for **FREE** nature-based programming designed to help children and their families connect with nearby nature through *games, activities, and crafts* that draw attention to the natural and built elements of their neighbourhood parks.

Come out and *explore and experience nature* with us through fun, open-ended programming that allows kids to be the architects of their own play!
